Professional summary

Full Stack Software Developer with years of experience brings a unique blend of technical expertise and business acumen, honed through previous roles in sales and management. Equipped with a robust skill set, including JavaScript, React.js, MySQL, Node.js, HTML5, Express, Tailwind CSS, Next.js, and MongoDB. I have designed, developed, and maintained sophisticated web applications. With a knack for innovation, this professional excels in developing strategies for customer retention and business growth, translating these skills into creating user-centric software solutions. Adept at analyzing market data and trends, the developer applies these insights to software development, ensuring products are in line with user needs and industry standards.

Skills

HTML5	CSS	Javascript	React	Next.js
Express	Node	MongoDB	MySql	Git

Recent Projects

Real Time Chat Application

Engineered a chat application utilizing Firebase, React.js, and Tailwind CSS for real-time communication. Integrated Firestore database for efficient message storage and retrieval. Executed comprehensive testing and debugging for optimal app performance. Collaborated with developers to add features and deployed the app for user access.

E-commerce- Application| TinyWear

Led a team of developers in creating scalable database applications, refining code in HTML, CSS, and JavaScript. Implemented customer-centric features like shopping carts and payment processing. Utilized MongoDB, React.js, and Node.js for developing tailored E-Commerce solutions.

AI- App

Developed a lightweight ChatGPT clone to simulate AI conversations, focusing on responsive design and intuitive user interactions. Leveraged HTML and CSS for UI development and JavaScript for dynamic content handling, including real-time user input processing and AI response generation. Conducted cross-browser testing to ensure optimal performance, resulting in an enhanced portfolio piece demonstrating front-end development skills and innovative problem-solving.
